

SHILO
TECHNOLOGICAL
DEVELOPMENTS

Your future starts with us. Just say yes.

We bring together creative minds from various disciplines. This is an effective way of furthering both our customers and ourselves.

Employing innovative solutions to drive our clients' and partners' businesses forward - this is what spurs us on. The cornerstones of our success are our committed, qualified and motivated employees. In order to develop their skills and talents, we create an environment in which employees are able to learn from one another and develop, both personally and professionally. It is important to us that fun and enjoyment are not left by the wayside when it comes to our day-to-day work.

To strengthen our team, we are looking for a

Senior Systems Engineer (m/f/x) Full- or part-time - 100 % Remote

What we offer you

A modern, international working environment in a welcoming and friendly atmosphere, with innovative technology and the opportunity to tap into challenging topics with high professional standards, as well as tangible benefits – for you, our partners, and our customers.

Your tasks

You design, develop, and operate stable and secure platforms. The internal and external processing of support cases in a wide variety of fields, as well as the active support of the configuration, monitoring, and further development of the systems, round off your range of responsibilities.

- You are responsible for the independent planning, documentation, and implementation of IT projects
- You are responsible for the monitoring and administration of the heterogeneous IT infrastructure of our customers and for guaranteeing smooth, ongoing operations
- You are the key contact person for incident management
- You coordinate with our software development team and ensure the provision of developmental and productive environments
- You work together with our business partners on a technical level for the integration of software and hardware systems

Your Skills

- More than 6 years of professional experience in a relevant professional field
- University degree in the field of computer sciences or a comparable qualification
- Sound knowledge of Microsoft technologies, especially Active Directory, Exchange Server and SQL Server
- Very well-versed in Linux, incl. the application of Apache and MySQL, among other programs
- Experience in the field of cloud platforms, e.g. Microsoft Azure or Amazon Web Services, with a key area being web technologies
- Confident in working with the protocols HTTP, SMTP, DNS, DHCP as well as Layer 2 and 3 Networking
- Fluent in both written and spoken English and German
- Very well-versed in MS Office (MS Word and MS Excel)
- Confident demeanour and pronounced communication skills

Sounds like you? Apply now!

Then we look forward to receiving your detailed application.
